Executive Directors are accountable for developing and maintaining a smooth relationship of management within the hospital. These positions have frequent contact with other administrative personnel, hospital department directors, medical staff, local, state and public health officials, federal and state governmental agencies and other governing and compliance boards. Their decision-making leadership enhances the smooth mode of operations through a chain of command, which implements the management of the hospital on a daily basis. The strong leadership and combined years of service of these dedicated leaders have contributed to the success of Boone Memorial Hospital.
